### Branding

Branding is defined as the process of coming up or making a certain product.

Having a good brand strategy allows you to have a major increase in your market competitions. Your brand tells your customers from the products and services you offer.

Are you innovative or are you the experienced type? Do you offer a high-value product, or a low-cost, high-value product? It's impossible to think without thinking what your customers need you to be. Your logo is your brand. All the promotional materials should be connected with your brand.

Brand messages are delivered and planned based on the target audience, whom and where your brand strategy is. Advertising and distribution channels are parts of brand strategy.

The branding strategy you have should be consistent across all your promotional materials.
